| Standards and Guidelines for Information Technology Infrastructure, Architecture, and Ongoing Operations | | |

The VCCS defaults to the VITA Enterprise Architecture Standard as a guide for its Infrastructure, Architecture, and Ongoing Operations. The VITA Enterprise Architecture Standard provides a robust framework for use in enterprise management. See http://www.vccs.edu/Portals/0/ContentAreas/ITS/Standards/Enterprise_Architecture_Standard.pdf for revisions to the published standards that better align with the VCCS designation as an institution of higher education.
